P

Preface

It gives us great pleasure to present our new book, 'Cost and Management Accounting'.

The present book aims to meet in full measure the requirement of students preparing for various commerce and management courses, opting Cost Accounting and Management Accounting in Indian Universities and Professional Courses. The latest syllabus of various professional courses like CA, CMA, CS, BBA, MBA, etc. is covered in the book. Syllabus of B.Com and M.Com of various Indian Universities under new National Education Policy (NEP) and under CBCS have been taken into consideration.

The objective of the present textbook is basic treatment of main principles of Cost and Management Accounting. The standard set for the book is complete clarity for beginners and such simplicity of exposition to make the text practically the best.

It is with this purpose the maximum ranges of Illustrations and Examples (more than 700) form the part of the textbook. The book covers almost all topics of Cost and Management Accounting. It runs in 18 chapters (spreading over 1,250 pages) and stands as a unique and most comprehensive treatise of various aspects of Cost and Management Accounting. There are two Appendices – Cost Accounting Standards (CAS) issued by Indian Institute of Cost and Management Accounting (CIMA) and Developments in Cost and Management Accounting.

Chapters of the book may be broadly grouped in following heads:

1. **Introduction of Cost and Management Accounting:** It explains the difference between Cost and Management Accounting and their main aspects. Elements of Cost and Methods of Costing are also discussed.
2. **Heads of Cost:** In the next head, Materials cost, Employees cost, Direct expenses and Overheads are explained in detail in separate comprehensive chapters.
3. **Unit Costing or Output Costing:** It is divided into Two Chapters – Unit Costing and Calculation of Tender Prices.
4. **Contract Costing:** The next section includes Job, Batch, and Contract Costing in detail incorporating new Accounting Standards.
5. **Process Costing:** This part is covered in three chapters – Process Costing and By-product Costing and Operating Costing.

6. **Activity-based Costing:** A new concept of Activity-based Costing (*ABC*) is explained in detail in a separate chapter. The concept is an improvement over indirect expenses.
7. **Double Entry System:** Double Entry System in costing is explained in two chapters – Cost Control Accounts and Integrated Cost Account. A chapter related to the ‘Reconciliation of Cost and Financial Accounting’ is also given.
8. **Marginal Costing:** Marginal Costing, Absorption Costing and Cost Volume Profit Analysis along with Decision-Making is given in a separate chapter. Each aspect is elaborately explained.
9. **Standard Costing:** It is an important concept of costing. In a separate chapter it is explained in detail along with variance analysis. Variance analysis is main technique of standard costing.
10. **Budgetary Control:** Budgetary Control and Budgets are also an important aspect of Cost and Management Accounting. It is discussed in separate chapter along with different kinds of budgets like Flexible budget and Cash budget.
11. **Appendices:** There are two important additional topics given at the end as Appendices. One is related to Developments in Cost and Management Accounting and other on brief description of Cost Accounting Standards (CAS) issued by CIMA.

Thus, it is a complete textbook and the students will find it as the best book for practice and comprehension of the subject.

We are grateful to the management of our publishers, Sultan Chand & Sons, New Delhi. We are very thankful to Shri Pratap Chand Vaish and Shri GD Chaudhary of the organization for their editorial guidance. Mr. Srikanth of Hyderabad has also helped in preparing manuscript. We are also thankful to Editorial and EDP staff of Sultan Chand & Sons for their untiring support. We invite suggestions and criticism for the improvement of the book.
