- o Banner management
- o Order Management/Report
- o Stock Management/Report

Delivery Timelines

The project schedule is based on the project start date. Any change in start date would amount to changes in all subsequent delivery dates. The actual project schedule and detailed planning inclusive of review received from Nature Labs., as discussed in initial discussion estimated project delivery is 45 Days.

Cost Estimation

Inde	Activity	Cost
x		
1	Website-Designing and Development (http://www.thenatureslabs.com/)	46000 INR
2	Windows Billing Software	
3	Hosting (yearly)	2000 INR
	Total	48000 INR

Milestone of payment	Item	% of price
schedule		
Milestone 1	Started of Project	30%
Milestone 2	After First Demo on Development Server	20%
Milestone 3	After Final Demo on Development Server	25%
	Upload on Client Server	25%

Assumptions:

This section provides overview of the perquisite and assumption for project execution:

- 1. Start date for project is based on the acknowledgement and required Items like theme/Images etc, received by the client for estimated work.
- 2. The web content shall be provided by clients and the scope of this work exclude any content writing.

Development

The development environment will be used for developing and testing future releases of the application. The version of the application deployed in the development environment will not be available to the end users and will be accessible only to the developers.

The development environment will also serve as the staging/QA environment for subsequent releases of the application but will not be used for any performance related testing since the server configurations in the development environment are not intended to replicate the production environment and thus will not give an accurate measure of how the application would perform in the production environment. The Source Code of developed software is property of Prabhuti systems and not shared with client.
